

Seminar and Certification

as a HypZert Real Estate Valuer for Mortgage Lending Valuation

CIS HypZert (MLV)

19 - 21 April 2018

7 - 9 June 2018

Background

German Pfandbrief banks trust in the local market expertise of real estate valuers. Due to banking regulation issues they do not just ask for a solid valuation report with a Market Value but also a Mortgage Lending Value (MLV) - according to the Regulation on Determination of MLV (Beleihungswertermittlungsverordnung; BelWertV).

The certification as a HypZert Real Estate Valuer for Mortgage Lending Valuation CIS HypZert (MLV) ensures that you are able to implement the MLV approach for properties outside Germany.

To date, more than 1,700 real estate valuers are certified by HypZert. Almost 100 of them hold the title CIS HypZert (MLV) and work abroad. These valuers are located in various countries of Europe as well as in the U.S.A. CIS HypZert (MLV) valuers are employed by German banks such as Deutsche Pfandbriefbank or by real estate service providers, such as CBRE, Colliers, Cushman & Wakefield, JLL, Knight Frank, or Savills. They do also work as freelancers or in small appraisal companies.

HypZert certified valuers

German Pfandbrief banks and the German Federal Financial Supervisory Authority rely on HypZert certifications. The certificate CIS HypZert (MLV) ensures that the valuer complies with the provisions of § 6 BelWertV. The certification as a Real Estate Valuer for Mortgage Lending Valuation - CIS HypZert (MLV) requires special technical knowledge regarding the determination of Market and Mortgage Lending Values of properties that are located outside Germany.

Mortgage Lending Value

The MLV is the prudently determined value of a property. It represents the value which throughout the entire life of the loan can probably be achieved for a property that is sold on the free market - irrespective of temporary (e.g. economically induced) value fluctuations in the respective property market. This requirement serves to eliminate speculative influences. The MLV is a key element of the valuation of real estate as performed by today's German Pfandbrief banks. When determining the MLV, the long-term, sustainable features of the property are taken into account, as are present and potential third-party uses and users. Hence this MLV with its regulatory and supervisory requirements is designed to comply with statutory standards that serve to protect creditors. Its characteristics are reflected in the form of specific ranges, minimum and maximum thresholds, methodological requirements, safety deductions and the requirement to include possible risks at certain points in the calculation.

Valuer's qualification

The rules for determining the MLV in Germany are stipulated in the Regulation on the Determination of MLV of Properties (BelWertV). § 25 BelWertV refers to lending against property outside of the Federal Republic of Germany. To comply with the specific requirements to valuers that are set forth in § 6 BelWertV, HypZert decided to also certify valuers who work abroad pursuant to ISO/IEC 17024. HypZert has set up Regional Groups in many cities in Germany, but also in Vienna, Amsterdam, Paris and London to promote professional networking between valuers.

Seminar "Mortgage Lending Value"

For this purpose, valuers are now able to prepare themselves for the certification examination with a specifically designed training unit regarding the MLV that is offered exclusively by the vdpPfandbriefAkademie. The seminar and the certification are addressed to candidates who

- » have already been working for several years in the valuation of property in other countries except the Federal Republic of Germany,
- » have an acknowledged title regarding the determination of market values, and
- » would now like to obtain an additional qualification in the field of Mortgage Lending Valuation.

Attached please find detailed information on the seminar and the certification. Please do not hesitate to contact us for any further inquiries.
